

Thank you for choosing “Journal Club.” Unfortunately, there is no desktop version of Journal Club for Mac.

To install the Journal Club you will need to double click on the jcDefnDB, and either the color or black and white version of Journal Club.

The next time you hotsync they will be installed to your pda.

You may also like to see my other programs, free software, medical pda information, Palm Os tutorials, and links at my website www.FPpda.com. You can get your free registration code there, as well.
